EDUCATION

University of Florida

Gainesville, FL | May 2028

B.S. Computer Science & Mathematics | GPA: 3.6/4.0

- **Relevant Coursework:** Data Structures & Algorithms, Discrete Mathematics, Programming Fundamentals, Object-Oriented Programming in C++ , Sets and Logic, Networking Fundamentals, Cyber Adversarial Tradecraft
- **Involvement:** Teaching Assistant for Programming Fundamentals, SSD, SHPE, ColorStack, ACM, UF ICPC Team

EXPERIENCE

Software Engineering Intern

May 2026 – Aug. 2026

NeuHawk Inc

Gainesville, FL

- Rebuilt legacy spreadsheet workflow as a React/Firebase platform supporting **1k+ research posts** across 100+ schools
- **Cut** average Firestore **query latency by 33% across 5,000+ requests** using composite indexes and multi-criteria filtering
- Tested features with **Vitest** and GitHub Actions CI, collaborating via PRs and deploying to **AWS EC2 using Docker**

Undergraduate Researcher

Jan. 2026 – May 2026

UF College of Electrical & Computer Engineering

Gainesville, FL

- Fine-tuned **Llama-3.1 8B** via **PyTorch** and **QLoRA** on **21,900+ records**, improving recall and cross-domain generalization
- Architected an **NLP** knowledge editing framework integrating **ICL**, achieving a **58% accuracy rate** for applying factual edits
- Built an LLM knowledge-editing evaluation pipeline computing vector distances across Efficacy and Neighborhood metrics to quantify edit accuracy and locality

PROJECTS

Concurrent Ticketing Platform | Java, Spring Boot, Go, PostgreSQL, Redis, Kafka, gRPC, Docker

Sep. 2026

- Developed concurrent seat reservations with **Spring Boot** and **PostgreSQL** locking, preventing double bookings across **10,000+ simulated requests**
- Designed an event-driven purchase pipeline with **Kafka** and transactional outbox, coordinating Go services through gRPC
- Increased reservation throughput **45%** via Redis caching and connection pooling while preserving transactional consistency

Fault-Tolerant Workflow Engine | Go, PostgreSQL, Redis Streams, gRPC, Docker

Jul. 2026

- Engineered a concurrent workflow engine in **Go** for scheduling and executing asynchronous tasks across worker processes
- Implemented **Redis Streams** consumer groups, retries, and task reclamation, recovering **99.9%** of jobs after worker failures
- Built **PostgreSQL** task state and **gRPC** worker coordination, sustaining **sub-millisecond** scheduling under concurrent load

AI Code Visualizer | TypeScript, Next.js, Pyodide, Zustand, D3.js, Gemini API

Jun. 2026

- Eliminated local Python setup by executing code in-browser through **Pyodide** within a **Next.js** and **Monaco Editor** IDE
- Made algorithm behavior inspectable by capturing runtime states with **Zustand** and rendering reversible **D3.js** playback
- Generated step-specific **Gemini** explanations grounded in execution snapshots, connecting source code with runtime behavior

LEADERSHIP

Google Student Ambassador

Aug. 2026 – Present

Google

Gainesville, FL

- Selected as **1 of 100 students** from **35,000+ nationwide applicants** for Google's inaugural U.S. Student Ambassador cohort
- Led partnerships with **3 student organizations** to organize **3 campus events**, engaging **250+ students** through workshops on practical applications of Gemini and other AI tools
- Spearheaded the collection and synthesis of feedback from **hundreds of students** through surveys and workshops, presenting actionable recommendations to the Gemini team to inform product improvements and student outreach

President

Jan. 2026 – Present

UF Society of Software Developers

- Delivered software engineering workshops to **2,000+ students**, boosting board operations to yield a **63% member increase**
- Streamlined operations by expanding executive board and **establishing 9 specialized leadership roles** to scale bandwidth
- Cultivated technical programming and instituted a project mentor framework, driving member engagement up by **33%**

TECHNICAL SKILLS

Languages: Python, Go, Java, TypeScript, JavaScript, SQL, C++

Backend & Frameworks: Spring Boot, React, Next.js, PyTorch, REST APIs, gRPC

Data & Messaging: PostgreSQL, Redis, Redis Streams, Firebase/Firestore, Apache Kafka

Infrastructure & Tools: AWS, Docker, Git, GitHub Actions, Vitest, Linux/Unix
