EDUCATION

University of Florida

Gainesville, FL | May 2028

B.S. Computer Science & Mathematics | GPA: 3.6/4.0

- **Relevant Coursework:** Data Structures & Algorithms, Discrete Mathematics, Programming Fundamentals, Object-Oriented Programming in C++, Sets and Logic, Networking Fundamentals, Cyber Adversarial Tradecraft
- **Involvement:** SSD, SHPE, ColorStack, ACM, SEC, UF Programming Team

TECHNICAL SKILLS

Languages: Python, GoLang, Java, TypeScript, JavaScript, SQL, C++

Backend & Frameworks: Spring Boot, React, Next.js, PyTorch, REST APIs, gRPC

Data & Messaging: PostgreSQL, Redis, Redis Streams, Firebase/Firestore, Apache Kafka

Infrastructure & Tools: AWS, Docker, Git, GitHub Actions, Vitest, Linux/Unix

EXPERIENCE

Campus Ambassador

Aug. 2026 – Present

Google Gainesville, FL

- Selected as **1 of 100 students** from **35,000+ nationwide applicants** for Google's inaugural U.S. Student Ambassador cohort
- Led a **300-person** flagship Google event teaching students how to leverage Gemini to improve their resumes and job search
- Built partnerships with **6 student organizations** to deliver **5 Gemini events** reaching **500+ students** through workshops

Undergraduate Teaching Assistant

Aug. 2026 – Present

University of Florida Gainesville, FL

- Supported nearly **500 students** through weekly office hours, debugging code and reinforcing core programming concepts
- Co-designed exam questions and programming test cases with faculty, shaping assessments used across the course
- Expanded course support **beyond** academics by building guides for portfolios, recruiting, LinkedIn, and cover letters

Software Engineering Intern

May 2026 – Aug. 2026

NeuHawk Inc Gainesville, FL

- Rebuilt a legacy spreadsheet workflow into a **React/Firebase** platform serving **2,000+ users across 100+ U.S. institutions**
- Cut Firestore **query latency 33% across 5,000+ requests** using composite indexes and multi-criteria filtering at scale
- Benchmarked core workflows under load and evaluated **AWS** deployment strategies to identify production scaling bottlenecks

Undergraduate Researcher

Jan. 2026 – May 2026

UF College of Electrical & Computer Engineering Gainesville, FL

- Fine-tuned **Llama-3.1 8B** via **PyTorch** and **QLoRA** on **21,900+ records**, improving recall and cross-domain generalization
- Developed a **knowledge-editing** framework with in-context learning, achieving **88% accuracy** on factual model updates
- Built reproducible evaluation tooling for **benchmarking** LLM editing methods across thousands of model outputs at scale

PROJECTS

Concurrent Ticketing Platform | Java, Spring Boot, Next.js, TypeScript, PostgreSQL

Sep. 2026

- Developing a full-stack ticketing platform with a **Next.js** frontend and **Spring Boot** REST API for end-to-end reservations
- Modeled **PostgreSQL** schemas for events, seats, and reservations to support booking workflows and data integrity
- Working on **Redis**-backed seat availability and **Kafka** event processing for scalable, fault-tolerant reservation workflows

Simulated Workflow Engine | Go, PostgreSQL, Redis Streams, gRPC, Docker

Jul. 2026

- Engineered a concurrent workflow engine in **Go** for scheduling and executing asynchronous tasks across worker processes
- Implemented **Redis Streams** consumer groups, retries, and task reclamation, recovering **99.9%** of jobs after worker failures
- Built **PostgreSQL** task state and **gRPC** worker coordination, sustaining **sub-millisecond** scheduling under concurrent load

AI Code Visualizer | TypeScript, Next.js, Pyodide, Zustand, D3.js, Gemini API

Jun. 2026

- Eliminated local Python setup by executing code in-browser through **Pyodide** within a **Next.js** and **Monaco Editor** IDE
- Made algorithm behavior inspectable by capturing runtime states with **Zustand** and rendering reversible **D3.js** playback
- Generated step-specific **Gemini** explanations grounded in execution snapshots, connecting source code with runtime behavior

LEADERSHIP

President

Jan. 2026 – Present

UF Society of Software Developers

- Restructured SSD into **6 departments**, leading **30+ officers** and supporting a community of **2,000+ student members**
- Expanded operations to manage nearly **\$30K in funding** for events, travel, career fairs, and student programming
- Hosted industry events with engineers from **Apple, NVIDIA, Meta, and Google** to connect students with tech careers
